Extremely rare 'Species X' rediscovered in Brazil after 75 ... In one of the most extraordinary stories in Brazilian conservation, a group of researchers have announced the comeback of the Blue-eyed Ground-dove. Last documented in 1941, it was believed extinct. But now the species has been found at top-secret locations in the Brazilian state of Minas Gerais.

Brazil Rediscovered - Roberta C. Wigder - Google Books Get Textbooks on Google Play. Rent and save from the world's largest eBookstore. Read, highlight, and take notes, across web, tablet, and phone. Monkey rediscovered in Brazil after 80 years Monkey rediscovered in Brazil after 80 years by Christina Selby on 9 August 2017 | An Ecuadorian naturalist collected the bald-faced Vanzolini saki in 1936 along the Eiru River. Blue-eyed Ground-Dove rediscovered in Brazil - eBird The rediscovery of such an emblematic and poorly known bird exclusive from Brazil is a remarkable scientific find. This event has been highly celebrated, as most researchers thought the species could already be extinct. Increasing the knowledge on Brazilian biodiversity is the first step to ensure its conservation.

Legendary Brazilian Anoles Rediscovered | Anole Annals On late 2014, Dr. Rodrigues and his students (including co-author Mauro Teixeira Jr.) launched an expedition to the mountains of Santa Teresa (state of Esp rito Santo, Brazil), the type locality of both *A. nasofrontalis* and *A. pseudotigrinus*. After a few days (and nights) of search, the team spotted the first *A. pseudotigrinus* in decades. The adult female was found sleeping on a narrow branch, (probably) unaware of its significance for South American biogeography (so were we. Brazilian Boa rediscovered This video is unavailable.
